# SHARK BLADES RGB STRIP

ADDRESSABLE  
**RGB**

**16.8**  
MILLION COLORS

# Colorful and Flexible

The SHARK Blades RGB Strip is optimally dimensioned for all common PC cases, and thanks to its flexibility, it can also be placed on corners and edges. The installation can be done either magnetically or by means of an adhesive strip on the mounting surface.

The strip has eighteen addressable 5050 RGB LEDs along a length of 360 millimeters. With a compatible mainboard, your hardware can be enhanced with a customized variety of colorful tones.

# RGB Connection Compatibility

Sharkoon products marked with the "ADDRESSABLE RGB" logo are compatible with mainboards which have headers for addressable RGB LED fans and strips. The headers should have the pin configuration 5V-D-coded-G and 5V-D-G. Examples of these RGB connections from the most important mainboard manufacturers are shown below.

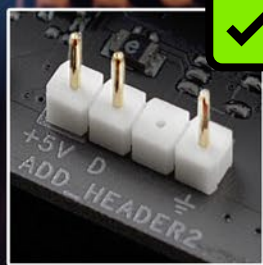

The RGB pin configuration is independent of manufacturer. However, the naming and marking of these connections may vary between manufacturers. For further information concerning compatibility, refer to the manual of your mainboard, or visit the manufacturer's website.

MSI

GIGABYTE

ASUS

ASUS

The SHARK Blades RGB Strip is certified for Asus Aura Sync, MSI Mystic Light Sync, Gigabyte Fusion and most other major market brands with matching pin layout, and is thus easily incorporated into existing systems.

For maximum compatibility, the RGB LEDs of the SHARK Blades RGB Strips are connected to a 3-pin 5V-D-G or a 4-pin 5V-D-coded-G header, depending on the mainboard.
