Power Supply Tunnel

With the compact S1000, a micro-ATX case incorporates a tunnel for the very first time. As a result, the power supply and hard drives can install discreetly to the case bottom and out of sight.

Versatile Installation Options

Mounting Bracket for up to Two 2.5" HDD/SSDs

Practical Cable Pass-Throughs

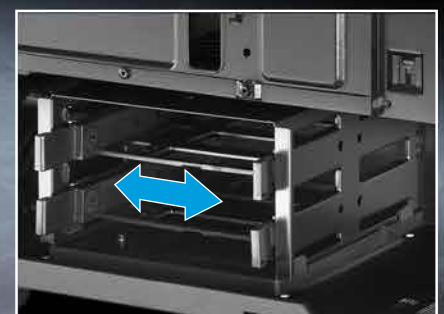

Systematic Arrangement

The power supply and up to two 3.5" or two 2.5" hard drives can be decoupled on the case bottom inside the tunnel, thus not detracting from the appearance.
